```java
1 import org.openqa.selenium.By;
4
5 public class Demo {
6
7     public static void main(String[] args) {
8         // TODO Auto-generated method stub
9
10         System.setProperty("webdriver.chrome.driver", "C:\\Users\\Amit Meta\\Downloads\\chromedriver_win32\\chromedriver.exe");
11         WebDriver driver=new ChromeDriver();
12         driver.get("http://facebook.com");
13         driver.findElement(By.xpath("//*[@id=\'email\']")).sendKeys("hello");
14     //driver.findElement(By.id("email")).sendKeys("This is my first code");
15     //driver.findElement(By.name("pass")).sendKeys("12345");
16     //driver.findElement(By.linkText("Forgot Account?")).click();
17     //driver.findElement(By.xpath("//*[@id=\'login_form\']/table/tbody/tr[3]/td[2]/div/a")).click();
18 }
19
20
21 }
```
